EZ Guide 3: EZ Guide Online!?

EZ Guide 2 Platform Limitations

- Current Platform – Microsoft Excel 2007
 - 2007 required due to 65,000 row limit in previous versions
 - Limited to Microsoft Windows only
 - Multiple versions of support required - Office 2007, Office 2010, etc.
- Performance limits
 - Default behavior – EVERY calculation redone on EVERY data change
 - Recalculation control programmatically tricky

EZ Guide Platform limitations (cont.)

- Control
 - Control of source code difficult
 - Needed to maintain reproducibility, consistency
- Upgrading and tracking
 - Upgrade completed profiles?
 - How to migrate existing data to newer versions?
 - No centralized tracking and analysis
- Interface Limitations
 - Cannot reuse forms
 - Availability of advanced interfaces
 - “Pop-in” forms
 - Maps

Solution – Move to Online

- Benefits
 - Server-side processing for performance
 - Better control of calculations
 - Platform independent
 - Only requires browser (Mozilla Firefox esp. for cross-platform)
 - Centralized data storage
 - Access from anywhere
 - Allows Clearinghouse to track and monitor Application
 - Application Control
 - Programming stored and controlled centrally
 - Upgrading and migrating can be done universally

Solution – Move to Online

- Cons
 - Available only while online
 - Processes not as transparent (but allows for more concise display)

EZ Guide Online - Development

- Development Plans
 - Initially focus on implementing EZ Guide 2 features
 - Target release – June 2011
 - After release focus on improvements
 - Capabilities extending current EZ Guide features
 - Projections
 - Implemented BMPs
 - Reporting
 - Multi-year calibration
 - Capabilities leveraging the online platform
 - Interactive interfaces
 - Map views and selections

Can associate multiple Utilities to a single Profile

The screenshot shows the 'Profile' form in the Conserve Florida Water Clearinghouse website. The form includes a navigation menu, a list of sections with checkmarks, and a form for creating a profile.

Profile

Typically a utility is associated with one profile, but the system v to Options/Utilities to define it.

This form has two steps:

1. Name the profile
2. Associate your profile with one or more utilities

Name of this Profile:

Links	Utilities	Data Request Status
Remove	Gainesville Regional Utilities	Complete

- Water Supply Analysis

Monthly Operation Report Analysis

The FDEP (MOR's) contain flow data for the average outflow from each water treatment plant. Monthly data for the most recent ten years are do site. The average daily flows are analyzed for the past decade in order to better describe the nature of water use for this utility. The user should against their MOR reports for incorrect entries. Errors that have been found include:

- Data entry
- Switching from gallons to million gallons and vice versa
- Missing data reported by FDEP that are on the original MOR that was sent to FDEP

Year for Analysis: 2008 **NOTICE: Saving a new analysis year may take several minutes**

- Water Audit

Link to Supporting Information	
M36 - Need valid link	Detailed guidance for conducting a water audit can be found in the M36 Manual, Audits and Leak Detection. The forms found in this manual have been embedded into EZG2.0 as shown by the four tabs in the screenshot. Accuracy. The M36 audit worksheets were developed by the M36 Manual. As a result, the worksheets are pre-populated with the M36 Manual data.
AWWA 4.0	AWWA Water Loss Control Committee (WLCC) Free Water Audit Worksheet used in conjunction with the M36 Manual.
SWFWMD	Southwest Florida Water Management District Water Audit Worksheet. To access the spreadsheet click the SWFWMD link.
SJRWMD	St. Johns River Water Management District Water Audit Worksheet. To access the form click the SJRWMD link.
Rural Water Audit	To download the Excel spreadsheet go to "Conservation" and click the "Rural Water Audit" link.

Water Audit Summary User Inputs

Audit Frequency:

Audit Method:

Water Loss Percentage: Default Value is 15%

Annual Unbilled Water Use

How can someone get the actual audit data? Specify a url, contact info, or phone number.
Call GRU and ask for Bob Smith in Audit.
